Made In-House

— SINCE 2005

More than two decades of La Med India

La Med India was established in 2005 in New Delhi with roots in dermatology and healthcare. Over two decades the company has built a broad Indian product portfolio and long-standing relationships with dermatologists, clinics, pharmacies and hospital groups across the country.

That foundation now powers a focused range of skincare, haircare and personal-care products – and our expansion into international cosmetic distribution, private label and custom formulation.

La Med India's wider experience across dermatology and healthcare gives our cosmetic business a strong foundation in product quality, professional relationships and market understanding.

Koziva is La Med India's own skincare brand – Korean-inspired formulations developed and marketed by La Med India.

Our products are manufactured in-house in GMP-compliant, ISO-certified facilities, giving us full control over formulation, quality and export documentation.
